

**M-Flex: A Brand Trusted by
Chimney Professionals and
Homeowners for More Than
20 Years!**

Now Chimney Professionals and Homeowners can choose between two types of Pre-Insulated Chimney Liners:

1. Our new Aluminum Outer w/Stainless Steel inner liner is priced lower and is lighter weight than Stainless Steel.
2. Our traditional Stainless Steel liner—inside and out—offers greater durability.

Both liners have highly durable Stainless Steel inside, both have a full half inch of insulation, and both are UL Listed with Lifetime Residential Warranties.

Your Safest, Best-performing Liner Choice

Available with a Stainless Steel inner & outer liner or a Stainless Steel inner with an Aluminum outer liner.

The Need for Chimney Insulation

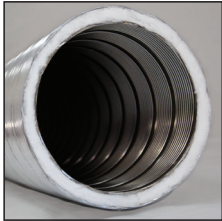

The most efficient venting systems allow for high temperatures to increase draft and reduce creosote build-up. And all chimneys need some kind of protection from high temperature extremes. This protection can be accomplished in a variety of ways:

- Using a traditional liner and filling the space between the liner and flue with Premier Insulation Mix—**good**

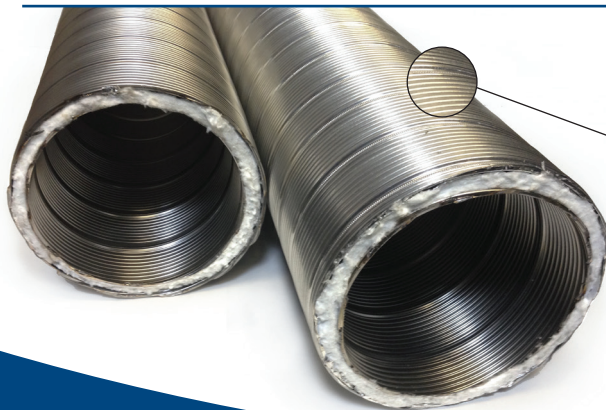

- Using a traditional liner and gluing insulated wrap and mesh to the outside of the liner—**better**

- Using a pre-insulated liner with double wall protection—**best**

Why Using Pre-insulated Liner is Best

- Homeowners and Chimney Professionals have the peace of mind of not having to worry about correctly placing spacers and unevenly mixing and pouring Premier Mix
- Chimney Professionals can save time & money by not having to purchase free-standing insulation wrap, mesh, tape, and adhesives
- Pre-insulated liner inserts quickly/easily without the fear of tearing the outer liner or wrapping material

M-Flex in Stainless and Aluminum Options

1. Mill certified .006 316 Stainless Steel on both Outside and Inside
2. Lighter-weight Aluminum Outside with the Rugged Durability of Inner Stainless Steel
3. The outer Aluminum Liner Option Allows for Additional Money Savings!
4. Also Available in Easy-to-Install Kits
5. Lifetime Warranties for Residential Use
